Report

1. Mission statement

ADLIB Information Systems, the makers of ADLIB software, have automated the collections of numerous libraries, museums and archives over the past twenty years. Many of our employees have a background in libraries and museums, giving them an inside-out knowledge of the sector. By listening carefully to the specific requirements of our customers, and by applying cutting-edge technology, we are able to continually improve our software. At ADLIB Information Systems, we put emphasis on open systems and international standards. The result: software that is exceptionally easy and pleasant to use, and a rapidly growing number of customers. In addition, we offer a comprehensive range of services: ADLIB users can consult our help desk whenever they need expert advice or support, whilst the wide range of courses available enable them to use their ADLIB applications to full advantage.

2. Computer Networks and Internet connectivity

Please tell your colleagues about your network type, protocols used, services provider, telecommunication equipment used, etc. below

a. In general HW, SW:

--

b. New HW, SW; connectivity upgrades:

--

Progress Report

3. Library automation

Please tell your colleagues below what library automated system you use, what hardware you use to run it and which unusual modules do you use or develop

a. In general HW, SW:

ADLIB Information Systems is supplier of the integrated library system ADLIB Library.

b. New HW, SW, other:

ADLIB Library Plus has been specially designed for use in Museum Libraries. The normal library functions are extended with features such as Exhibition documentation, Visual documentation (images, reproductions, etc), Auction information and conservation administration.

ADLIB Webportal is a new product that will enable libraries and other ADLIB users to integrate accessibility to a host of information sources. The ADLIB Webportal combines a Content Management Systems with an easy to use web interface.
